Summary

Final-year B.Tech Computer Science student at VIT with strong foundations in **Data Structures and Algorithms**, **Object-Oriented Programming** and **backend system development**. Experienced in building **Python-based backend systems**, **RESTful APIs**, and scalable application logic through a **Python Developer Internship at IIT Bombay (FOSSEE)** and real-world projects with **Global Rank 186 in Meta Hacker Cup**.

Experience

FOSSEE Summer Intern – Python Developer

Feb 2025 – Jun 2025

IIT Bombay

Mumbai Internship Report

- Developed and maintained **backend computation modules in Python** for **Osdag**, an open-source structural engineering software used by **10,000+ engineers**, adhering to **IS 800:2007** standards.
- Implemented **constraint-driven backend logic** and designed **reusable, testable Python modules**, improving system reliability while following clean code practices and the **software development life cycle (SDLC)**.

Software Taxonomy Analyst (Contractual)

Sep 2024 – Jan 2025

Outlier AI

Remote

- Classified and analyzed **100+ multi-language code snippets (Python, C++)**, contributing to structured code understanding systems.
- Applied structured logic and **edge-case analysis** to improve dataset consistency and reduce ambiguity in backend-related code patterns.

Projects

MailMantra — Scalable Backend for Intelligent Email Automation [\[GitHub\]](#)

Oct 2025

- Engineered a Python-based backend automation system for large-scale email workflows, delivering **2,900 personalized job applications** with **97.9% success rate** and **90% inbox placement**.
- Architected batching, rate limiting, and retry mechanisms to ensure **100% Gmail API compliance**, while implementing DNS MX and syntax validation to reduce bounce rates by **83%** with zero API failures.

DocuGenAI — Backend Platform for AI-Driven Document Generation [\[GitHub\]](#) [\[Live\]](#)

Sep 2025

- Built a full-stack document generation platform using **FastAPI + React**, exposing RESTful backend APIs for dynamic content workflows.
- Designed a fault-tolerant backend pipeline with API fallbacks to maintain high availability while controlling external service costs.

BillBuddy — Production-Ready Invoice & Payment Backend Platform [\[GitHub\]](#)

Aug 2025

- Developed a backend-centric invoice management system with secure CRUD operations, automated email reminders, and CSV-based financial reporting.
- Integrated **Stripe webhooks** for PCI-compliant, real-time multi-currency payments (INR) and deployed the system using **Docker**, HTTPS reverse proxy, and **CI/CD pipelines** for production-ready scalability.

Omdena — Pothole Detection (Global Collaboration, Computer Vision)

2022

- Collaborated with an international Omdena team (Mexico-based cohort) to develop a **pothole detection system** using computer vision techniques.
- Prepared and curated datasets using **Roboflow**, contributing to data quality improvement and training readiness.

Education

Vellore Institute of Technology

B.Tech Computer Science and Engineering

2022 – 2026

CGPA: 8.54 / 10

Technical Skills

Languages & Core CS: Python, C++, SQL, Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks

Backend & Databases: FastAPI, RESTful API Development, JWT Authentication, Backend Architecture, Software Development Life Cycle (SDLC), PostgreSQL, SQLite, SQLAlchemy, Open Source

Tools & Platforms: Git, GitHub, Postman, Docker, CI/CD Pipelines, Debugging; **ML (Working Knowledge):** PyTorch, Scikit-learn, Model Training and Deployment

Achievements & Certifications

- Postman API Student Expert — 2024 [\[Certificate\]](#)
- Oracle Autonomous Database Cloud Professional — 2025 [\[Certificate\]](#)
- AWS Educate: Introduction to Cloud 101 — 2025 [\[Certificate\]](#)
- Meta Hacker Cup 2025 — Global Rank **186** (Top **0.5%**)
- Infosys HackWithInfy 2025 — **Finalist**
- Finance Co-Lead, EDU4U Club — Managed budgeting, expense tracking, and financial coordination for student-led initiatives.
